

Help Give a Woman a New Life

Up to one million women across Africa and Asia needlessly suffer from obstetric fistula—a devastating childbirth injury that leaves them incontinent and isolated.

A \$624 surgery can end a woman's suffering and restore her health.

Since 2009, we've funded more than 125,000 surgeries across 35+ countries. Join us to ensure that no woman is left behind.

Ruth, a 34-year-old fistula survivor from Uganda received free, life-transforming care from our partner Kitovu Hospital. Today, she is smiling again, with her health restored, and a bright future in front of her.
